SALES • SERVICE • SINCE 1985

5-100 Castlefrank Rd. Kanata, ON K2L 2V6 613-836-4504

Does your game console or portable handheld game console not work anymore? Does your system not read discs any longer? Do you not want to pay the game manufacturer insane amounts of money to get your console fixed? Give us a try, we have excellent service and we have very good pricing and a fast turnaround.

Stop letting your game console collect dust just because it doesn't work anymore. Bring it in to us to resurrect your almighty gaming system!

When you bring us your Console we will sign it in and there is a \$15 diagnostic charge. Once we determine what is wrong with the unit, we will give you an estimate and then it's up to you whether you want the repair done.

We give Warranty on all repairs!

Computerconcepts.ca does not condone nor encourage any act of software or game piracy. Owners of gaming consoles are expected to act responsibly within the confines of state and federal laws regarding such acts.

Backups:

In many countries it is legal to install and use a mod chip in one's own personal game console. However, the copying and selling of copied games is illegal in most countries. Some country's laws do not allow their citizens to use backups, even if one owns the original. You must first check with your own country's laws, and respect them. If it is not legal for you to make backups in your region, then you must purchase a legal version of the game from a retailer.

Computerconcepts.ca does not condone the illegal copying and/or distribution of software for gaming consoles or any other format. Users must make themselves aware of the laws that apply to their country and comply fully with them! Respect the software industry, respect the law and use products according to their licensing requirements. You must remember that the intended purpose of a modchip is to allow a gaming console to play imports and backups of software that you legally own or have designed yourself, and this is permitted by the law in most countries. However, to reiterate, ALWAYS check with your local laws to avoid any potential legal action.
